System Information Gathered by Miller Tanner.com

Web Server Logs

Miller Tanner web servers generate temporary logs that may contain the following information:

- Internet address (IP address) of computer being used
- Web pages requested
- Referring Web page
- Browser used
- Date and Time

The data is used in aggregate by IT custodians to tune the Web site for its efficiency and is not ordinarily associated with specific individuals. Raw data from the Web server logs is only shared with the custodian of each Web site and does not contain information regarding a person's identity or place of work. Summary reports produced from the logs help Web publishers determine what Web browsers and pages are most popular so we can use the information to tune our system and maintain superior performance.
